5 Key risks / invalidations

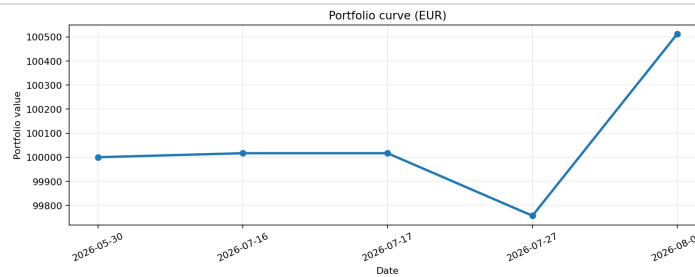

Risk	Invalidation / resolution
Strategic divergence	5 promoted exposures are not represented
Product mapping	Unverified ISIN/trading lines remain blocked
Legacy portfolio	The three older core positions VWCE, EUNA and SXR8 remain historical portfolio context; LOCK is now the fourth active model position.
Cash	Cash may not be deployed without allocator and execution review

6 Bottom line

The shared Weekly ETF engine supplies strategy and opportunities. The EU layer maps them to exact UCITS trading lines and keeps reporting, evidence and allocation separate. The current report outcome contains four official model positions; LOCK is active, VVSM remains monitored and unfunded, and no new broker order was placed in this review.

Current-position review

Ticker	Action	Score/tier	Fresh-cash test	Role	Next test
LOCK	Hold	Satellite	Review active position	Cybersecurity satellite	No new broker order; monitor within strategy and risk limits
VWCE	Hold	Core	Re-underwrite	Global core equity	Compare with shared top exposures
EUNA	Hold	Stabiliser	Re-underwrite	Stabilising aggregate bonds	Compare with shared top exposures
SXR8	Hold	Core satellite	Re-underwrite	U.S. equity overweight	Compare with shared top exposures

Overlap and disposition review

Ticker	Current weight	Measured overlap lower bound	Embedded exposure lower bound	Stage 1	Future role	Evidence limitation
VWCE	25.24%	9.11% versus VVSM	2.27% of NAV	Hold	Retain as core and set a permanent cap later	Documented top holdings only; actual overlap is at least this high
SXR8	7.19%	20.95% versus VWCE; 11.87% versus VVSM	0.84% of NAV	Hold	Priority source for stage-2 overlap reduction once ex-U.S. core is fundable	Lower bound based on documented top holdings
EUNA	7.46%	Not comparable through equity holdings	Role diversification	Hold	Change only after an explicit risk and drawdown budget test	Assess through duration, volatility and stabilisation role

Documented semiconductor exposure embedded in VWCE and SXR8 totals at least 3.10% of the portfolio. A measured zero for cybersecurity does not prove zero actual overlap because only part of LOCK's holdings set is documented.

16 Input for the next run

Required input for the next review

- Rebuild the latest shared strategy and opportunity set.
- Re-underwrite the six current UCITS mappings and new promotions.
- Refresh exact KID, completed-close, bid/ask, size and liquidity data before an allocation change.
- Preserve the official portfolio whenever a required gate does not pass.
- Handle report delivery as a separate controlled step.
