

ETF EU Cockpit Content-Complete Candidate

Review-only content-complete candidate - NOT DELIVERED - AUTHORITY BLOCKED

1. Cockpit header with report date and authority markers

report_date=2026-07-03 | work_package_id=ETF-EU-WP15R | content_completeness_candidate=true
REVIEW-ONLY | NOT DELIVERED | NO RECEIPT | NO PRODUCTION MANIFEST | AUTHORITY BLOCKED
production_delivery=false | valuation_grade=false | funding_authority=false | portfolio_mutation=false

2. Executive read and action summary

Current posture: cash-only seed / no funded UCITS ETF holdings approved in this package.
Client decision frame: prepare EU/UCITS cockpit content; do not promote or fund candidates.
Action summary: HOLD CASH / REVIEW CANDIDATES / NO DELIVERY / NO LIVE DATA REFRESH.
Key gap: pricing, KID, liquidity and line evidence must be refreshed in a later authorized package

3. Portfolio holdings and cash snapshot

Funded ETF holdings: none. Cash status: review-only cash placeholder; portfolio_mutation=false.
Total valuation surface: not valuation-grade; no portfolio total is promoted by WP15R.
Residual cash: not changed; no trade ledger mutation; no candidate funding authority

4. Allocation and concentration summary

Allocation: 100% cash placeholder because no UCITS ETF is funded under current authority.
Concentration risk: no market exposure concentration; process risk is evidence incompleteness.
Next risk control: content-complete build must remain visibly blocked until source/freshness dates pass

7. Holding-level decision table

Cash | action=hold_cash | thesis=preserve authority boundary | invalidation=explicit funding decision later.
CSPX/SXR8 | action=review_candidate | thesis=core U.S. equity UCITS candidate | invalidation=pricing/KID/line gap.
SMH UCITS | action=watch | thesis=semiconductor exposure candidate | invalidation=verification incomplete.
Gold ETC | action=blocked_policy_review | thesis=hedge reference | invalidation=not UCITS ETF under current policy.

ETF EU Cockpit Content-Complete Candidate

Input/state and investability evidence - review-only, no live refresh

5. UCITS investability table

IE00B5BMR087 | iShares Core S&P 500 UCITS ETF | provider=iShares/BlackRock | UCITS=confirmed | KID=available.
Trading line: SXR8.DE | exchange=Xetra | currency=EUR | pricing_symbol=SXR8.DE | status=verified_candidate_not_funded.
IE00BMC38736 | VanEck Semiconductor UCITS ETF | provider=VanEck | UCITS=confirmed_by_name | KID=available.
Trading line: SMH | exchange=pending_verification | currency=USD | pricing_symbol=pending_verification.
TRD | iShares Physical Gold ETC | provider=iShares/BlackRock | UCITS=not_ucits_etc | status=blocked_policy_review

6. Pricing and freshness evidence table

CSPX/SXR8 | latest_close_date=not_fetched_in_WP15R | latest_close=not_fetched_in_WP15R.
CSPX/SXR8 | pricing_source=not_refreshed_in_WP15R | pricing_freshness_status=unresolved_for_review_candidate.
SMH UCITS | latest_close_date=not_fetched_in_WP15R | latest_close=not_fetched_in_WP15R.
Gold ETC | pricing not relevant to UCITS-only funding until policy permits ETC exposure.
Disclosure: WP15R performs no live data fetch and creates no pricing evidence, changed authority

8. Watchlist and candidate pipeline with promotion status

CSPX / SXR8 | pipeline=core_equity_candidate | promotion_status=not_promoted | required_next=pricing/KID/line freshness.
SMH UCITS | pipeline=thematic_candidate | promotion_status=not_promoted | required_next=full exchange-line verification.
INFR candidate | pipeline=infrastructure_placeholder | promotion_status=not_promoted | required_next=issuer/ISIN/KID verification.
Gold ETC | pipeline=hedge_reference | promotion_status=blocked | required_next=policy decision on ETC eligibility

Minimum visible fields for funded or investable rows

isin | fund_name | provider | ucits_status | priips_kid_status | exchange_ticker | trading_currency | primary_exchange
pricing_symbol | latest_close_date | latest_close | pricing_source | pricing_freshness_status | ter_or_cost_status
replication_method_or_unknown | distribution_policy_or_unknown | hedged_unhedged_or_unknown

ETF EU Cockpit Content-Complete Candidate

Risk, proxy disclosure, unresolved data and governance footer

9. Risk, regime and event context

Market/regime context: not refreshed in WP15R; this candidate is format/content completeness only.

Risk posture: avoid funded exposure until UCITS pricing, freshness, KID, liquidity and source gates are satisfied.

Event context: omitted as live macro/calendar fetch is outside WP15R authority

10. Proxy and benchmark disclosure

U.S. ETFs SPY, SMH, GLD and PAVE are research proxies / benchmark comparators only.

U.S. ETFs are not EU portfolio holdings and must not be displayed as Dutch/EU-investable funded instruments.

All investable instruments must remain ISIN-first and UCITS-first unless policy explicitly changes

11. Unresolved-data and limitation block

Unresolved: live pricing not fetched, valuation-grade evidence not created, portfolio not revalued.

Unresolved: KID/TER/liquidity/replication gaps remain review-needed where registry marks pending_verification.

Unresolved: Dutch language quality and bilingual parity gates not run against this candidate.

Limitation: content-complete candidate build is not client-grade delivery and not delivery-preflight authority

12. Validation and governance footer

Required validators: content_completeness, no_us_etf_as_eu_holding, isin_first_holdings, ucits_status_present.

Required validators: priips_kid_status_present, pricing_source_and_freshness_present, proxy_disclosure_present.

Required validators: unresolved_data_block_present, delivery_boundary_markers_present.

Output contract status: all 12 visible sections are present in this review-only candidate PDF.

Authority: delivery_authorization_decision=remain_blocked | delivery_preflight_allowed=false | outbound_path_enabled=false.

Artifacts: build artifact + notes + validator + tests; selected_next_package=ETF-EU-WP15S.
